ULTRA-D WINS BEST OF SHOW AT ISE 2017

65" Glasses-Free 3D Display Honored at Europe's Premiere Digital Signage Expo

RAI, AMSTERDAM – ISE2017, Hall 14 Stand C155 (Feb. 10, 2017) – [Stream TV Networks, Inc.](http://www.ultra-d.com)™ was honored today with a Best in Show Award at the Integrated Systems Europe expo for its Glasses-Free 3D technology. Specifically acknowledged was the company's flagship product, a 65" Ultra-D™ display running on Signagelive's CMS platform with eye-popping content playing on IDea's XMP-7300 true 4K media player.

The award was presented by Installation, which publishes a monthly magazine and an up-to-the-minute website as well as daily and weekly e-newsletters. Those publications inform the professional AV & systems integration marketplace about the latest business, technology, application and regional trends across all aspects of the industry: the integration of audio, video and lighting. Installation also manages an expanding range of events including the annual InstallAwards and InstallFutures.

"It's great to see that our Ultra-D technology captured the attention of Installation's ISE judges, just like they're capturing viewers in public installations all over the world," said Stream TV CEO Mathu Rajan. "Being selected as 'Best in Show' at an event as prestigious as ISE is quite an honor."

Stream TV's Ultra-D technology was awarded alongside the achievements of companies like Sharp, Leyard, Planar, Harman, Peerless-AV and more. For a full list of winners, see:
